INTERCOMS SINCE 1967

# ASTRO

look beyond

**ASTRO** is the line of internal stations that represents the answer to the most recent transversal requests for building communication. Compact in size, Astro is characterized by an **essential and fresh look** that adapts to, indeed can enhance, any furniture both in the intercom and video intercom versions. The design is particularly refined with the aim of offering maximum ease of use: large keys, ergonomic handset, luminous signals, simple and intuitive icons.

The particular care in the materials chosen proposes new satin finishes that restore sensations of elegance and modernity, both to the eye and to the touch.

The offer consists of three items: the AT962 intercom with handset, the AT9262 video intercom with handset and 4.3" screen, and the AT972 hands-free intercom. Astro communicates with all Farfisa door stations in **DUO System** installations and goes particularly well with the line of Alba door stations. Flush mounting, it supports the programming mode via Bluetooth for all functions.
